

Welcome to the Humble Intro to Coding Bundle 2020 - Tier 3!

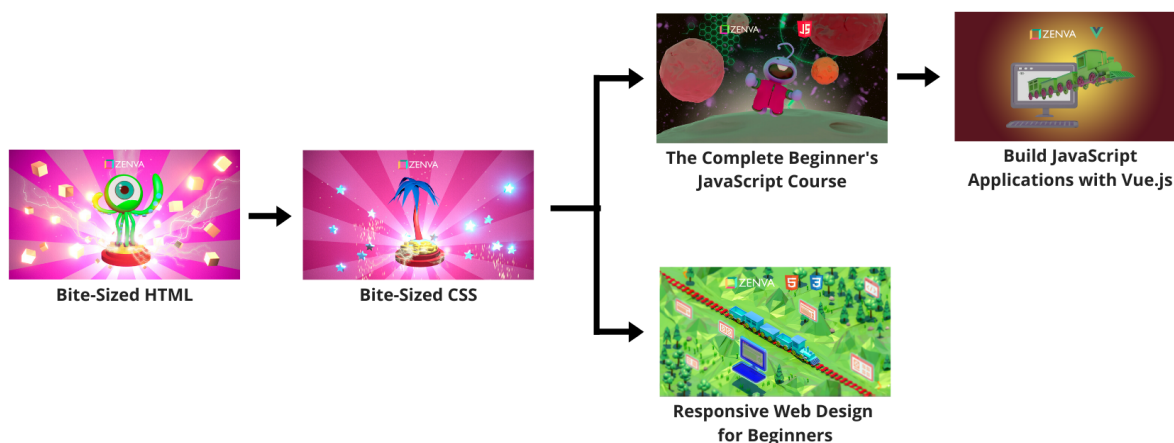

Congratulations! Where others have merely thought about expanding their horizons by learning to code, you have actually taken the first steps to do so! This bundle is designed to give you a comprehensive introduction into all things coding, covering web development, Python development, advanced data science projects, Unity game development, Phaser game development, and mobile app development. Regardless of which area of development you wish to specialize in, this curriculum will get you up and running on your programming journey!

Where do I start?

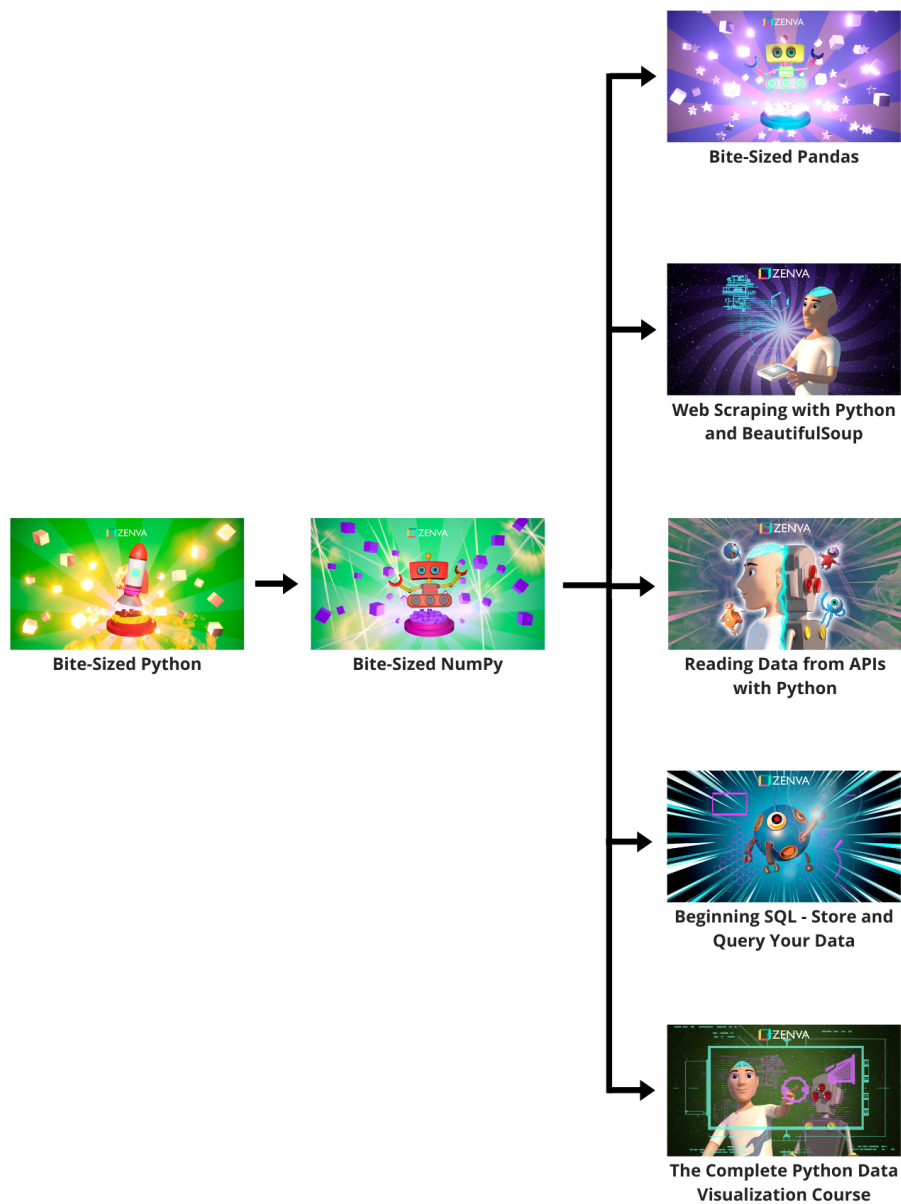

If you're unsure of what area of development interests you the most, then we suggest you work through the courses in the lesson order presented below in My Courses > Curriculums > Humble Intro to Coding Bundle 2020 - Tier 3.

However, if there's an area of development that you're particularly passionate about and wish to start on first, below are some suggested learning paths:

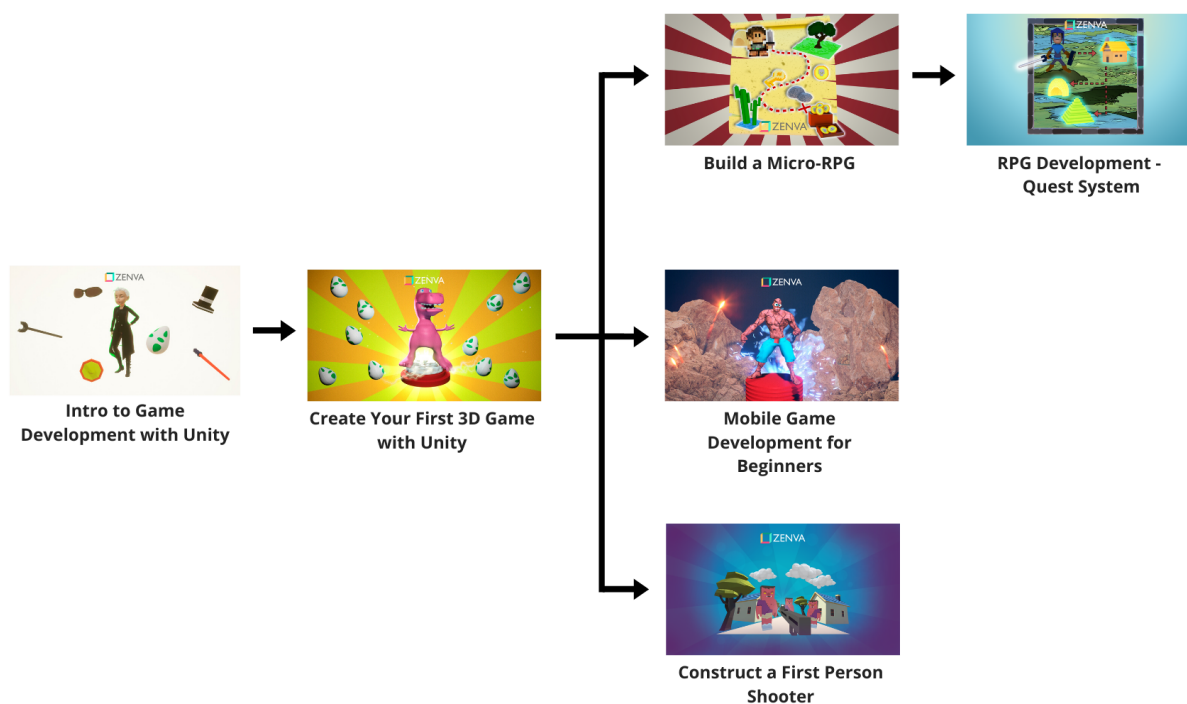

Web Development

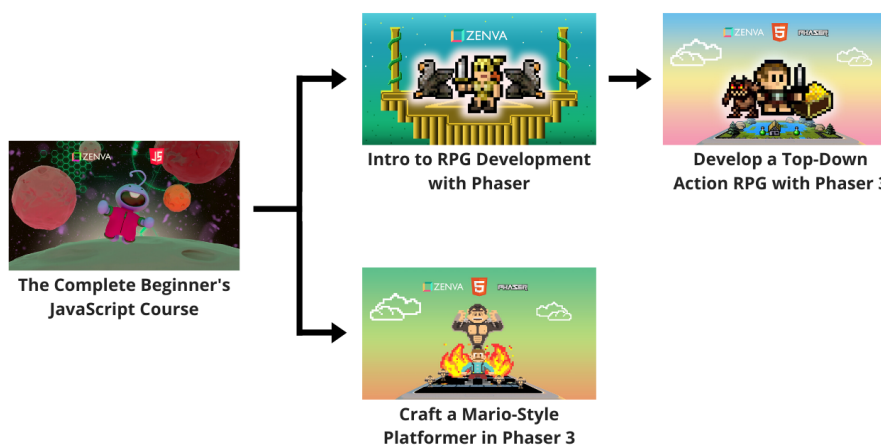

Python & Data Science

Unity Game Development

Phaser Game Development

Mobile App Development

Intro to Java for Android Development

Kotlin for Beginners

iOS App Development for Beginners

The Complete Mobile App Development Course with Flutter

Frequently Asked Questions (FAQs)
